SUMMARY

Front-End Developer with 2+ years of experience working on frontend platforms in a high-scale iGaming ecosystem supporting 100+ operators. Experienced in developing frontend architectures across multiple paradigms, including performance-focused SSR systems, web component-driven SPA applications, and legacy-to-modern migrations.

EXPERIENCE

Junior Front-End Developer – EVERYMATRIX | 04/2024 – Present

- Contributed to a build-per-client SSR architecture consisting of multiple independent Astro applications within a shared codebase, leveraging a shared React component library and a standardized infrastructure setup across all operators.
- Worked within a multi-layer caching strategy spanning CDN (Cloudflare), edge/web server (Nginx), service workers and browser storage, optimizing data fetching and load performance, achieving 95+ Lighthouse performance score.
- Worked on an Angular application leveraging a modular UI architecture based on versioned Web Components (Stencil, Svelte) distributed as npm packages from a centralized monorepo.
- Enabled reusable feature development across 50+ operators while maintaining compatibility with both legacy and modern APIs across successive platform generations.
- Maintained and subsequently contributed to the migration from AngularJS to modern Angular of a large-scale backoffice application.
- Developed and maintained a Node.js WebSocket proxy handling caching and data transformation.
- Implemented integration-heavy features across multiple backend services.

EDUCATION

Bachelor's Degree in Medical Engineering – UNSTPB | 2019 – 2023

Master's Degree in Artificial Intelligence – UNSTPB | 2023 – Present

SKILLS

Frontend:	React, Astro, Angular, Svelte
Web Architecture:	SSR, Web Components, Microfrontend-like architectures, Caching
Testing:	Jest
Backend:	Node.js, Nginx
Programming:	JavaScript, TypeScript, Python, C
AI (Academic):	LLMs, NLP, Computer Vision
